

C program for the conversion of temperature from Fahrenheit to Celcius

```
#include <stdio.h>
int main ()
{
    float fahr, cels;
    printf("Enter Fahrenheit value: \n");
    scanf("%f", &fahr);
    cels = ((fahr - 32) * 5) / 9;
    printf("Temperature in celcius = %.f", cels);
    return 0;
}
```
